My Dream

I want to be an engineer so I can make robots. Why? I have two big reasons.

First, I like robots. I liked watching movies about robots when I was a child. I asked for toy robots as my birthday presents.

Second, robots can do many things. There are robots that help people, and those that do translations. Now, robots even care for people. When I went to see my grandmother at the nursing home, I saw her smiling and talking to a caring robot. She looked very happy.

I want to study hard to be a robotics engineer and I want to make robots that help people in need.
