Censorship

Censorship is the control of information, ideas, and opinions that flow within a society. Censorship can be used on programs on television, movies, printed books, printed magazines, video games and everything on the Internet. Censorship helps save children from violence but it could also lead to ignorance. Censorship can help stop the spread of wrong information but it can also violate freedom of speech. Censorship has a lot of advantages and disadvantages so there are a lot of discussions on whether to consider it good or bad.

You should begin with this sentence: One day, Miss Sato noticed that her students spend too much time on their computers.
